Sola Lhim

- solalhim0609@gmail.com - (657) 246-9690 - Fullerton, CA - LinkedIn - GitHub

M.S. Computer Science student with research experience in AI, formal verification, computer vision, and automation systems. Developed machine learning, data engineering, and full-stack applications through academic research and industry internships.

Education

California State University, Fullerton (Fullerton, CA) **Aug 2025 - Present**
Master of Science, Computer Science - GPA 4.0

Fullerton College (Fullerton, CA) **Jan 2023 - May 2025**
Certificate in Business, Computer Info Systems, and Economic Workforce Development Division - GPA 3.6

Rikkyo University (Tokyo, Japan) **Apr 2010 - Mar 2015**
Bachelor of Arts, Law and Politics – GPA 3.2

Work / Research / Internship Experiences

Research Intern, UC Riverside - Advisor: Dr. Zhouxing Shi (Riverside, CA) **May 2026 - Present**
- Identified *silent repair*: LLM formalizers quietly fix flawed informal proofs, so kernel acceptance certifies nothing about faithfulness.
- Built an edit-blind judge detecting 36.8–46.7% of these at 3.5% false positives, where kernel acceptance stays flat.

Research Assistant, Cal State Fullerton - Advisor: Nabila Tanjeem (Fullerton, CA) **May 2026 - Present**
- Built a real-time closed-loop control system bridging software and optical hardware for automated image collection.
- Running RL-driven light-exposure pattern optimization for desired nanoscale particle pattern formation.

Research Assistant, Cal State Fullerton - Advisor: Anand Panangadan (Fullerton, CA) **Aug 2025 - May 2026**
- Developed a custom Raspberry Pi 5–based module integrating RGB camera and thermal imaging systems.
- Engineered an RGB–thermal IR fusion pipeline for cooking-state classification using a machine learning model.
- Lifted accuracy from 65% to 78%; first-author paper accepted at IEEE Workshop on AI for HealthCare (AIHC 2026).

Data Engineer Intern, Office of Inst. Effectiveness, Fullerton College (Fullerton, CA) **Feb 2025 - Aug 2025**
- Designed and deployed a centralized data platform on Azure with CI/CD pipelines and automated ETL workflows.
- Replacing manual reporting for 50+ staff; implemented role-based access control and one-click deployment.

Translator, (Seoul, Korea) **Dec 2018 - Aug 2025**
- Delivered Japanese-Korean translations with cultural localizations for documentaries and corporate research projects.

Projects

US Citizenship Interview Prep App (iOS &Android)
- Shipped a React Native app to the App Store and Google Play with a fully automated EAS build-and-release pipeline.
- Built a FastAPI backend orchestrating GPT and Google Civic APIs for voice-based citizenship interview simulation.

Skills

- Programming: Python, Swift, JavaScript, C++, C, Java, SQL
- CI/CD & Automation: Azure DevOps, GitHub Actions, EAS
- Tooling & Platforms: Git/GitHub, Docker, shell scripting, Linux/Unix, Azure (App Services, Storage)
- Web & APIs: Node.js, REST APIs, FastAPI, React Native
- AI / ML / Computer Vision: object detection(YOLO), multimodal sensor fusion (RGB + thermal IR), Lean 4 formal verification
- Languages: English, Japanese, Korean (fluent)
